SUMMARY

Flutter developer with 3 years of experience in building and deploying mobile applications. Developed and delivered over 10 apps across various industries, focusing on performance, user experience, and responsive design. Skilled in integrating third-party APIs, managing state, and optimizing app performance for both Android and iOS platforms.

EDUCATION

Bachelor's Degree in Software Engineering
Damascus University

08/2019 – 08/2024

PROFESSIONAL EXPERIENCE

Flutter Developer

11/2024 – present

Wi Technologies 🌐

- Played a key role in developing and maintaining the Uber app, ensuring a seamless and intuitive user experience.
- Analyzed and implemented new features, collaborating with cross-functional teams to align with business objectives.
- Conducted in-depth analysis of user requirements and feature specifications to create scalable and efficient solutions.

Flutter Developer

11/2023 – 11/2024

Warshatec 🌐

- Led a team of junior Flutter developers, providing guidance, mentorship, and code reviews to ensure high-quality deliverables.
- Developed more than five diverse applications, showcasing versatility.
- Designed and implemented dynamic forms and fields to enhance user interaction and adaptability.
- Crafted applications using real-time socket, Maps API, and Firebase features.
- Uploaded and published apps to both Google Play and Apple Store.

Flutter Developer

04/2023 – 11/2023

SDNone

- Edited and enhanced multiple production apps by adding new features, fixing bugs, and improving overall performance and user experience.
- Crafted applications using real-time socket, Maps API, and Firebase features.
- Uploaded and published apps to both Google Play and Apple Store.

Flutter Web Developer

07/2022 – 02/2023

Developed a web-based system for a government organization to automate data entry and generate official documents, improving efficiency and reducing manual errors.

PROJECTS

SHARJAH AWARD FOR EDUCATIONAL EXCELLENCE

Mobile App for the Government of the Emirate of Sharjah to coordinate and arrange the registration process for the categories within the Sharjah Award for Excellence and Educational Excellence, to judge the submitted forms, and to determine the winners from the forms that meet all the conditions, marks, and standards of a specific category.

Wi App 🌐

taxi booking

- Implemented core functionalities like user authentication, real-time location tracking, ride booking, trip management, and payment integration.

- Integrated APIs for map-based navigation and geolocation using Google Maps API or similar services.
- Worked on WebSocket-based real-time updates for trip statuses and notifications.

NumberOne [↗](#)

Food Delivery

- Crafted a comprehensive food delivery system, covering 3 applications for customers, drivers, and restaurants.
- Incorporated real-time socket functionality to enhance user communication and provide real-time order

Herafi [↗](#)

Developed an app that allows users to request various services and receive offers from service providers matching their needs. The app also enables users to become service providers themselves, submitting offers for service requests using the same account

oldaleppo [↗](#)

The Old Aleppo Lighthouse application allows the user to access the services provided in the lighthouse and book an appointment to submit or extract the required documents, in addition to the possibility of reserving a seat within the activities available within the application and displaying the heritage sites of the Old City of Aleppo.

BRK app [↗](#)

E-Commerce

Al Baraka Industrial Investment Company is a leading manufacturer and supplier of high quality plastic pipe fittings for various industries. With more than 20 years of experience in this field, the company has established itself as a trusted and reliable source for all types of plastic pipes and fittings. Our application will allow users to get rewards. These rewards can be in the form of points, cash, a gift or other incentives. Our application usually offers a variety of ways for users to earn rewards such as completing online shopping and sharing with friends.

Mazayah

A tracking app for shipments (containers or parcels) that allows customers to trace their packages from the origin country to their doorstep after registering and subscribing.

Mall Automation System

platform that allowed investors to engage with stores, streamlining operations and offering unique features like investor-owned stores, efficient warehouse management, and free deliveries. This project was a successful collaboration during my college studies, showcasing my technical skills and teamwork abilities.

SKILLS

Flutter, Dart

Android, IOS, Web, Animations, DevTools, Freezed, Get_It, Retrofit, Extensions, Restful API, SqfLite

Software Engineering

OOP, Clean Architecture, MVC, MVVM, SOLID Principles, Design Patterns,

State Managements

Bloc, GetX, RiverPod, Provider

Tools

Figma, XD, Jira, Git, CI/CD, Realtime(Pusher, WebSocket), Maps API

VOLUNTEERING

RBCs Team

Delivering Helping Lectures & Workshops
